

HISTORY

The carnal dog (Anatorian Shepherd dog) has been in long history for 4,000 years. It lived among highland and mountain in Aristocracies or nobleman class fond of the carnal dog for being present and souvenir. The carnal dog was very popular for raising at the old time. It was patient in both very hot and cold weather. The archeologist is confirmed by discovery things in he Huckcila City is located at the west of Turkey and the place is nearby the Kenya city, the dog of this lineage is very old ancient dog. The rock plate that they had found out assures the assures the archeologist, it was 7,000 years ago before A.D. and was carved for telling about the people were immigrating to other place by having dog look like this lineage of dog along with them. The objective immigration was traveling from the East continent to he West in the same manner as at the Gordion in the middle of Anatorian, there is the ancient drawing picture is 1,200 years old before A.D. It is a picture about a dog, was a guard of the herd of cattle, wearing sharpen sting collar. The dog, which was in the picture, look likes the carnal dog at the present time. Moreover, there are many interested things in the museum in England such as drawing pictures and carved stone that we can see the life of carnal dog at the old period. The book, is 1,800 years old before A.D., describe about the one of the big creamy dog that looked after the herd of cattle in the Central Asian continent at the time (Turkey at the present time). Now, Turkey, the people know this lineage's dog is "Carabche" or "Black Head" name. In another book, the name is "Travel to Turkey" the author is "Hunch Grooner" (in 1592), mention of this dog's lineage too. In the literature of Efriya Seleby (1611-1681 A.D.) whoset the name of this dog's bloodline is "Samsan" or "Lion dog" The record of Mustafa Kemal (who was former insurrection in Turkey, Turkish know him in "Artatuek" name), mention of this carnal dog and the fox were fighting and the dog was winning finally. It until he reach the successfully aim. The next, we better lern from more information about the carbgal dog. Firstly we should know about the geography area, strategic area and civilization of Turkey before developing to Western area. We are starting from Anatorian Kingdom since 100 years ago. At the old dated, before roman intruded into Turkey with Morosser dog, there were groups of religion war came into Turkey first with another lineage's dog that looked quite like Masiv and also saluki dog or Iran that could be seen at the moment. Later, there was born the dog, which work for looke after the herd of large size animal, is bigger that Kuras dog, stronger that Pirenian dog (mountain dog), and moreover it could be in a brutal ciricumstance of this country. The several hundreds years had passing by, the carnal dog still good working for guarding the flocks of goats and sheep to be free from Taors fox, mountain lion and bear attacked. Not only just in the dry and badly hot summer that the carnal dog could good adjust itself to, but also in the deeply could low to -4 degree celcius that it could live. As badly weather, the Due to such the badly circumstance, made the carnal dog to be quite strong, patient, loyal and brave. The king, at the moment, such as King Ottoman (18 A.D.) tried so hard to conserve this lineage's dog. Same the manner as Kapanoclu family desired to do. Finally, these dogs, which were very popular among the class of the aristocracy for hundreds years ago, were set to be the stabdard dog for 50 years ago and as well know in "Carabaz" in Turkey. The government has made demanding to set the propogate dog program again in several city for exemple, Angkala, Ulas, Carbgal since a few years. On October 1996, there is the dog competition of this lineage's dog for the first time at Konya City in Turkey. Almost of cattle farmer in

Anatolian extremely tried to long way journey to finding good quality descent to be paired with their own. Recently the carnal dog is accepted to be a famous dog and being the national dog of Turkey. Especially the carnal dog is a restricted dog for exporting.

HABIT

First of all, we should know that the carnal dog is derived from former dog and it was not be developed with the right way at the beginning of season and was not get human warmth at all. This lineage dog must to work lonely in Turkey without trainer. However, it could do anything by own nature. It took for hundreds years that the lineage's dog must be fatally troublesome living, so they made it more clever, strong, patient and brave. It could protect itself and fight for any situation by fearless. It has courageous and instinct of protection its owner, and also quite good defending of possessions. Obviously character, it is always proud of itself and fierceless behavior and it will particularly trust just their owner or there intimate person only. So you must be careful when it face to stranger because it will not entrust any stranger and dose not accept anyone to close it. We can see the carnal dog is big figure when it is 2 years old up. It grows up to the full when it passed 4 years. The carnal dog has a virgin mind. However, we need to take time to make it trust. When it was a puppy, it prefers to play. Till it grows up, it will be habit changed to keep danger watching for a herd of cows, a flock of goats and sheep, house watching and protect its owner from any danger. It could even die for protecting crowd of animals from fierce animal attacked. Whoever has the carnal dog in possession, they will proud of it.

HOW TO FEED AND TAKE CARE

If you have feed "the Anatolian Shepherd Dog" in the area which has a lot of people, you must have responsibility and patience. It is very clever and self-confident dog. It like to protect its owner so how train is not easy. You should train since it was young and must treat it with attention. Remember! Don't treat it with violence because it can bear. An effort is the best way. Whenever your dog admit you, it will do everything for you. For the Hunt "The Anatolian Shepherd dog" is very active. It never let its prey escape, at the same time it still keep an eye on the herd of cattle which it's looking after including the offspring it doesn't like to play ball with the owner. About food and cure "The Anatolian Shepherd dog" is easy to take food. Naturally it is a clean dog and doesn't have the body odor. In the past it has confronted with cruel nature so far it hardly sick. Nowadays it is a healthy dog .

STANDARD

Turkey, there is not the carnal's dog only, but also other 2 lineage's dog is famous. The carnal dog of Chival city, the name is "Anbache", is white dog from the West of Turkey and the third lineage is "Carls dog" is raised in the Eskishia city. The third one, we can see in the north of Turkey, look like the Caocasar Ocasar. All three of dogs are already registered to F.C.I.
